The proposed housing allocations would harm the character and setting of the area through extensive loss of Green Belt land.	SD1.1	The Council plans to optimise the use of previously developed land in the urban areas where it is possible to do so in the first instance. The urban capacity is approximately 6,500-7,000 homes which would not meet the need for the Borough. The Council therefore undertook a Green Belt review which examined whether land currently designated as Green Belt continues to meet the purposes and aims for which it was first designated including whether it has prevented and continues to prevent urban sprawl. This is in accordance with the requirements set out in Chapter 9 of the NPPF which was produced by national government. Those areas that were found to only partly contribute or no longer contribute to these purposes were assessed by other studies on other matters as to whether development would be appropriate. The findings of all these studies combined informed the proposed site allocations in the Draft Local Plan. In addition, Chapters 12 and 17 provide policies on good design and conserving the historic environment to ensure that the character of an area is not adversely affected by development. <p>The scale of housing growth proposed is excessive.</p>	<p>SD1.2</p>	<p>Paragraph 47 of the NPPF states that Local Plans should plan to meet the full, objectively assessed need for housing. The Borough's future housing need is based on the findings of the Strategic Housing Market Assessment (SHMA) which was commissioned by the Council in partnership with neighbouring authorities. The SHMA sets out that the objectively assessed need for the Borough, in line with the NPPF, should be in the region of 15,260 to 16,740 homes in the period 2014 to 2034. Therefore, the Council will seek to meet the overall objectively assessed need for at least 15,260 homes within Basildon Borough over the plan period. Growth at the lower end of the scale assumes participation by older people within the local economy at the rates set out by the Office of Budget Responsibility (OBR). This is considered to be a broadly appropriate position with regard to the economic potential of those over 60 years of age.</p>	<p>None required.</p>	<p>DLP/88, DLP/203, DLP/368, DLP/457, DLP/585, DLP/647, DLP/668, DLP/786, DLP/834, DLP/1007, DLP/1058, DLP/1085, DLP/1224, DLP/1284, DLP/1488, DLP/1518, DLP/1535, DLP/2154, DLP/2184, DLP/2243, DLP/2290, DLP/2796, DLP/3007, DLP/3045, DLP/3338, DLP/3500, DLP/5121, DLP/5871, DLP/13564, DLP/169, DLP/17969, DLP/7213, DLP/7222, DLP/7231, DLP/7242, DLP/7255, DLP/14254, DLP/14488, DLP/7041, DLP/20469, DLP/19993DLPQQ/32, DLPQQ/33, DLPQQ/362, DLPQQ/94, DLPQQ/179, DLPQQ/392, DLPQQ/551, DLPQQ/991, DLPQQ/301, DLPQQ/207, DLPQQ/221, DLPQQ/293, DLPQQ/343, DLPQQ/307, DLPQQ/292, DLPQQ/228, DLPQQ/237, DLPQQ/368, DLPQQ/280, DLPQQ/407, DLPQQ/405, DLPQQ/378, DLPQQ/794, DLPQQ/484, DLPQQ/440, DLPQQ/481, DLPQQ/453, DLPQQ/482, DLPQQ/914, DLPQQ/680, DLPQQ/859</p>

The Draft Local Plan was published in advance of the SHMA.	SD1.6	It is agreed that it was not desirable to progress to consultation in advance of the publication of the SHMA. However, Basildon Council was satisfied that the figures in the emerging SHMA were robust and broadly reflected likely need for housing in Basildon. The SHMA was a shared project between five Local Planning Authorities, and it was important that all parties were satisfied with the SHMA in relation to their area before it was published. This resulted in a delay to the publication of the SHMA, which put at risk the Council's timetable for the preparation of the Local Plan. A decision was therefore taken to prepare a topic paper setting out Basildon's results only to accompany the consultation.	None required. Impact on house prices / views will be lost as a result of additional development.	SD1.7	It is recognised that some people pay a premium for a view from their property. However, there is no legal right to a view over another person's land, and the planning system does not provide protection in such regards.	None required. Basildon should consider the potential for cross boundary development opportunity in west Rayleigh, within Rochford District.	SD1.8	There is sufficient capacity within the existing urban areas to accommodate around 6,500 to 7,000 homes. In addition to this, Policies H8 to H29 identify sufficient sites to secure around 8,000 homes on the edge of settlements within the Borough. This mix of provision will enable the overall housing requirement to be met on land within the Borough.	The Council will keep this situation under review in the development of the Local Plan in the event any evidence or priorities change.	DLP/1942

<p>Housing delivery should be achieved at the upper end of the OAN range or higher.</p>	<p>SD1.9</p>	<p>The Council has given consideration to the range of housing need identified in the SHMA. The level of growth represented by the lower end of the range of OAN is sufficient to address uncertainties arising around the participation of older people in the economy, by ensuring that Office of Budget Responsibility assumptions can be met within the resident labour supply. This level of growth also aligns with the GLA Central Scenario, thereby accommodating increased levels of out-migration from London than is otherwise captured in the 2012-based SNPP. The upper end of the OAN range applies very conservative assumptions around the participation of older people in the economy, which is not supported by the Office of Budget Responsibility. There is therefore no justification for growth at the upper end of the OAN range, particularly as the requirement for affordable housing provision sites at around 20%-25% of need.</p>	<p>None required.</p>	<p>DLP/350, DLP/654, DLP/686, DLP/687, DLP/1402, DLP/1465, DLP/1515, DLP/1735, DLP/1942, DLP/2302, DLP/2016, DLP/2024, DLP/2029, DLP/2194, DLP/2210, DLP/2304, DLP/2416, DLP/2929, DLP/2519, DLP/3070, DLP/2730, DLP/2746, DLP/2800, DLP/2846, DLP/2945, DLP/3044, DLP/3401, DLP/4343, DLP/4593, DLP/7046, DLP/2195, DLP/2851</p>

<p>There is insufficient infrastructure to support new development.</p>	<p>SD1.10</p>	<p>Additional infrastructure is proposed as part of this plan, as set out in chapters 9, 13 and 18. Policies H7 to H29 identify the site specific infrastructure to be provided alongside individual developments. Policy IMP1 expects the delivery of new infrastructure alongside the delivery of housing and other forms of development. Policy IMP3 deals with matters associated with the phasing of development to ensure it is aligned with the provision of supporting infrastructure and community services. In addition, the Infrastructure Delivery Plan (IDP) will be reviewed on a regular basis and treated as a 'living' document which will be used to inform decisions on infrastructure delivery. The IDP will continue to be updated and should not be read as an exhaustive assessment of infrastructure requirements at one moment in time. Policy is clear that development proposals which would see infrastructure capacity exceeded will not be accepted.</p>	<p>The Council will continue to work with infrastructure partners and will update the Infrastructure Delivery Plan to reflect changes and the progress made in delivering the plan and securing key pieces of infrastructure.</p>	<p>DLP/1, DLP/77, DLP/83, DLP/84, DLP/86, DLP/90, DLP/100, DLP/101, DLP/103, DLP/109, DLP/185, DLP/191, DLP/203, DLP/237, DLP/257, DLP/263, DLP/273, DLP/308, DLP/311, DLP/312, DLP/367, DLP/425, DLP/457, DLP/533, DLP/565, DLP/585, DLP/610, DLP/625, DLP/643, DLP/656, DLP/786, DLP/814, DLP/815, DLP/1082, DLP/1224, DLP/1273, DLP/1278, DLP/1284, DLP/1332, DLP/1458, DLP/1518, DLP/1535, DLP/1653, DLP/1804, DLP/1884, DLP/1906, DLP/1924, DLP/2006, DLP/2121, DLP/2266, DLP/2413, DLP/2417, DLP/2837, DLP/2842, DLP/2882, DLP/2932, DLP/2947, DLP/2971, DLP/3091, DLP/3092, DLP/3096, DLP/3098, DLP/3135, DLP/3157, DLP/3172, DLP/3189, DLP/3239, DLP/3260, DLP/3319, DLP/3337, DLP/3340, DLP/3344, DLP/3500, DLP/3559, DLP/4287, DLP/4440, DLP/4594, DLP/4786, DLP/5121, DLP/8033, DLP/8213, DLP/8755, DLP/8944, DLP/9068, DLP/9333, DLP/9344, DLP/9354, DLP/9364, DLP/9374, DLP/9397, DLP/9496, DLP/9847, DLP/14283, DLP/14455, DLP/14970, DLP/16219, DLP/16222, DLP/16235, DLP/16283, DLP/16524, DLP/18052, DLP/20187, DLP/20538, DLP/20553, DLP/20559, DLP/20590, DLP/13526, DLP/9931, DLP/16283,</p>

The SHMA builds on work undertaken for Greater Essex authorities on demographic forecasting, and on economic forecasting undertaken for the East of England group of authorities using the East of England Forecasting Model to understand the local drivers of housing need in South Essex. The Council is unable to demonstrate its ability to meet the NPPF's requirement for five year housing land supply. As a consequence, a greater proportion of the required homes is likely to be delivered in the period beyond 2020, when the sites on the edge of settlements begin to benefit from the detailed planning consents. Due to similar issues affecting the other authorities within the South Essex Housing Market Area, it has not been possible to resolve this issue through cross-boundary working. Therefore, the Local Plan sets out a pragmatic response to the matter, by proposing an initial housing delivery target of 615 homes per annum to 2020, followed by a higher target of	The Council will keep this situation under review in the development of the Local Plan in the event any evidence or priorities change. Basildon Council should consider accommodating a greater level of housing growth as a consequence of neighbouring authorities being unable to meet their own housing needs.	SD1.25	Basildon does not currently have an overprovision of sites, and there has been no evidence to date to support the proposition that some unmet needs can be met within Basildon Borough. The proposal requires the re-definition of the Green Belt, which is not supported by national policy.	SD1.26	The NPPF makes it clear that Local Planning Authorities (LPAs) should plan positively to meet the development needs of the area, with sufficient flexibility to adapt to rapid change. One of the NPPF's Core Planning Principles is to meet the objectively assessed need for housing, business and other development needs of an area and respond positively to wider opportunities for growth. In accordance with national planning policy, the LPA must consider whether its Green Belt boundaries need to be adjusted through the review of the Local Plan in order to allocate enough land to meet those	None required. The Plan is not sustainable; it has an economic bias.	SD1.27	A sustainability appraisal report has been prepared, which assesses the relative merits of different levels of growth. That appraisal, prepared independently of the Council, concludes that the level of growth set out in the Draft Local Plan is the most sustainable, generating benefits across a range of social, environmental and economic indicators. Lower levels of growth would not result in such sustainable outcomes. <p>The loss of green belt will have a negative impact on the environment/agriculture/food production.</p>	<p>SD1.29</p>	<p>In line with the NPPF, the Council must demonstrate that its objectively assessed need can be met on sites that are ready for development. The Green Belt review identified the most appropriate locations for development so that the areas of highest green belt value can be protected and defensible in the long term. In line with Section 19 of the Planning and Compulsory Purchase Act 2004, the Council has carried out a 'sustainability appraisal' of the proposals in the Local Plan. This overlaps with some of the requirements in the Environmental Assessment of Plans and Programmes Regulations 2004, which gives effect to European Union Directive 2001/42/EC on the assessment of effect of certain plans and programmes on the environment. In addition, a Habitat Regulation Assessment is a requirement from the European Habitat Directive (92/43/EEC) and is necessary to assess the impact of the Local Plan's policies and proposals on sites of international importance. Both assessments make recommendations to the policies that the Council must take account of in the preparation of the Local Plan and its policies. The NPPF requires the highest level of protection to be given to the Best and Most Versatile Agricultural Land. Agricultural land falls into three grades. Concerned that high levels of unemployment will be created by the proposed housing growth.	SD1.30	The supply-demand balance analysis contained in the Basildon Employment Land and Premise Study has shown that the Borough is well placed to meet many of the Borough's employment needs that are anticipated over the plan period. The proposed level of provision is assessed to be compliant with the NPPF as it pro-actively encourages sustainable economic growth and inward investment to the Borough, as well as supporting Basildon's role as an economic and business hub. The plan is not specific to Billericay.	SD1.32	The Council has distributed a proportionate amount of growth to each of its settlements, having regard to the capacity of the environment to accommodate such growth. An Infrastructure Baseline Report (2015) has been prepared to accompany the plan, which identifies the level of current provision of infrastructure within the Borough, and the need for additional infrastructure to support the level and distribution of growth set out in the plan. Green Belt is been used a land bank.	SD1.34	The Council plans to optimise the use of previously developed land in the urban areas where it is possible to do so in the first instance. The urban capacity is approximately 6,500-7,000 homes which would not meet the need for the Borough. The Council therefore undertook a Green Belt review which examined whether land currently designated as Green Belt continues to meet the purposes and aims for which it was first designated including whether it has prevented and continues to prevent urban sprawl. This is in accordance with the requirements set out in Chapter 9 of the NPPF which was produced by national government. Those areas that were found to only partly contribute or no longer contribute to these purposes were assessed by other studies on other matters as to whether development would be appropriate. The findings of all these studies combined informed the proposed site allocations in the Draft Local Plan.	None required.	DLP/920, DLPQQ/363

Object to development on Green Belt.	SD1.38	The NPPF makes it clear that Local Planning Authorities (LPAs) should plan positively to meet the development needs of the area, with sufficient flexibility to adapt to rapid change. One of the NPPF's Core Planning Principles is to meet the objectively assessed need for housing, business and other development needs of an area and respond positively to wider opportunities for growth. In accordance with national planning policy, the LPA must consider whether its Green Belt boundaries need to be adjusted through the review of the Local Plan in order to allocate enough land to meet those needs. The Council has many evidence base documents that have been used in the preparation of the Local Plan to determine the most appropriate sites that will have the least negative impact, including assessing the landscape, Green Belt, historic environment and infrastructure improvements. The Green Belt review identified the most appropriate locations for development so that the areas of highest green belt value can be protected and defensible in the long term.	None required. The Council's policy is to ask for objections to each of the local planning proposals.	SD1.39	The Council has no policy on how comments should be made on the Local Plan. The vision and objectives for development and change within the Borough are followed by an initial suite of policies that set out the strategic approach to growth and the distribution of development across the Borough in order to achieve a sustainable pattern of development. Thereafter, the Local Plan has been structured to follow the thematic approach set out in the NPPF. Residents, businesses and other stakeholders were able to comment on any of the draft policies and allocations set out in the Draft Local Plan.	None required.	DLP/858, DLPQQ/1006

Object to the central government's imposition of housing quotas.	SD1.40	The Borough's future housing need is based on the findings of the Strategic Housing Market Assessment (SHMA) which was commissioned by the Council in partnership with neighbouring authorities. The SHMA sets out the objectively assessed need for the Borough, in line with the NPPF.	None required.	DLP/858, DLP/971, DLPQQ/681
Billericay Town Council should adopt the housing that is currently under the control of Waltham Forest in Outwood Common.	SD1.41	Noted. However, this is not a consideration that the Council can take into account when developing its Local Plan. The Local Plan may be supplemented by Neighbourhood Plans prepared by Parish, Village or Town Councils, or Neighbourhood Forums, in accordance with the Localism Act 2011. These will set out additional planning policies for the management of development in smaller, distinctive localities, in accordance with the Local Plan.	None required.	DLP/585, DLP/1512, DLP/1889, DLP/14465
The Local Plan lacks creativity.	SD1.42	The Local Plan has been prepared in accordance with the requirements of the Town and Country Planning Act 1990 (as amended), and the Town and Country Planning (Local Planning) (England) Regulations 2012. The document has been structured to follow the thematic approach set out in the National Planning Policy Framework (NPPF) (2012). An evidence-based approach has been taken in its preparation in order to ensure that the plan is robust and responds positively to local issues.	None required.	DLP/585, DLP20228,

Houses are being built to fulfil an imagined future need.	SD1.44	The NPPF requires Local Plans to be drawn up over an appropriate time scale (typically over a period of 15 to 20 years) and makes it clear that LPAs should plan positively to meet the development needs of the area over the plan period. One of the NPPF's Core Planning Principles is to meet the objectively assessed need for housing, business and other development needs of an area and respond positively to wider opportunities for growth. The evidence presented in the SHMA has been structured around the methodological steps set out within the PPG for assessing housing need, using the analysis to arrive at a recommended objective assessment of need (OAN) range for Basildon Borough, in compliance with the PPG and the NPPF.	None required.	DLP/971
The SHMA should reflect the 2014-based sub-national population projections.	SD1.45	Noted. The 2014-based sub-national population projections was yet to be published as at the period of the Draft Local Plan consultation. The Council will keep this situation under review in the development of the Local Plan in the event any evidence or priorities change.	The Council will keep under review the latest population projections and determine how these impact the development requirements of the Borough.	DLP/654, DLP/1402, DLP/4593

The OAN scenario adopted by the council does not appear to have been undertaken within the SHMA Topic Paper.	SD1.46	The SHMA recommends that individual authorities should consider the implications of potential policy factors in taking the OAN forward into policy. The Council has given consideration to the range of housing need identified in the SHMA and among other policy factors, concluded that the Council will seek to meet the overall objectively assessed need for at least 15,260 homes over the plan period.	None required.	DLP/654, DLP/3044

Suggests alternative land to be allocated for housing development.	SD1.48	Noted. The most appropriate locations for development have been determined through application of the communal result of all documents contributing to the Council's Local Plan evidence base. The Council will however keep this situation under review in the development of the Local Plan in the event any evidence or priorities change.	Review appropriateness of development location in light of merits of counter proposals and new/updated evidence.	DLP/654, DLP/2210, DLP/3070, DLP/8028, DLPQQ/149

<p>Object to accommodating growth/in-migration from London or elsewhere.</p>	<p>SD1.49</p>	<p>In Basildon, natural change has consistently been the main driver of population growth. This alone gives rise to the need for an extra 550 homes per year within the Borough over the plan period. Paragraph 47 of the NPPF states that Local Plans should plan to meet the full, objectively assessed need for housing. Paragraph 159 confirms that such calculations of need should include both migration and demographic change. This is confirmed within the Planning Practice Guidance. The approach to calculating OAN for housing within the Planning Practice Guidance has been applied in the South Essex SHMA 2016. Unmet housing need has not been the only consideration when determining whether revisions to the Green Belt boundary constitutes 'exceptional circumstances'. Economic and social impacts for not delivering housing has also been considered as has the findings of the Green Belt Review which assessed whether all of the Borough's Green Belt still contributes to the Green Belt purposes. The Council will keep this situation under review in the development of the Local Plan in the event any evidence or priorities change.

The borough will be unable to take on growth/protect the green belt beyond the plan period.	SD1.54	The NPPF requires Local Plans to be drawn up over an appropriate time scale (typically over a period of 15 to 20 years), be kept up to date, and deliverable over the plan period. The Council will use the Authority Monitoring Report to provide up-to-date information on the implementation of the plan, and to determine whether there is a need to undertake a partial or full review of the Local Plan should monitoring identify that policies and allocations are not being achieved or are not in compliance with up to date policy. It is not possible to say what will happen after this plan ends as the planning system and legislation may have changed.	None required. <p>New job provision should be targeted at those who currently commute out of the Borough or unemployed local residents.</p>	<p>SD1.56</p>	<p>A key principle underpinning the Government's sectoral approach to land supply modelling is to reflect employment sectors which are likely to have prospects for better success in the future, in terms of generating increased value and employment to the UK economy. This approach would support the ELPS demand led approach to forecasting future need for employment land over the plan period. <p>Green Belt should only be developed provided other land is dedicated and maintained as effective Nature Reserve or Wildlife Corridor in perpetuity, at the developer's or new residents' expense.</p>	<p>SD1.57</p>	<p>The NPPF requires Local Plans to be deliverable. Paragraph 173 states that the sites identified in the plan should not be subject to such a scale of obligations and policy burdens that their ability to be developed viably is threatened. As set out in Policy H 1, Housing Strategy, the Council will seek opportunities to ensure new development contribute towards the creation of sustainable communities through location and design, in order to achieve the wider objectives of the plan. This will include the provision of integrated formal public open space, and the enhancement of the green infrastructure network to offer a range of environmental benefits including the management of the impacts on and impacts of climate change. 		implementation would be determined through the planning application process where development details will be expected to be in accordance with the strategic policies contained in the Local Plan.		
Houses should be built to cater for natural growth/local needs only.	SD1.58	<p>Paragraph 47 of the NPPF states that Local Plans should plan to meet the full, objectively assessed need for housing. In objectively assessing housing needs and to comply with the NPPF and PPG, the Council has a statutory duty to provide for its development needs in line with the Government's growth agenda, which impacts on an area wider than the Borough; such as the Thames Gateway, the East of England, the South East and the UK. The PPG identifies the sub-national household projections (SNHP) as the 'starting point' for the estimate of overall need, which should be adjusted to reflect local demographic factors and evidence; the need to support economic growth; and the need to take account of appropriate market signals. The approach to calculating OAN for housing within the Planning Practice Guidance has been applied in the South Essex SHMA 2016. This identifies the need for housing in Basildon Borough, and forms the basis for the target in the Draft Local Plan.</p>	None required. Seeks a higher level of affordable housing, accessible to local people.	SD1.59	It is agreed that the Council should provide housing which meets the needs of local people. Affordable Housing is specific types of housing defined in the NPPF. The SHMA has undertaken an assessment of the need for affordable housing and has determined that this need sits around 20-22% of the total housing requirement. The total number of homes built in the plan period will be significantly higher than is proposed in the plan.	SD1.60	The Local Plan will be monitored to provide crucial feedback into the process of plan-making in order to ensure that the Local Plan policies are being implemented and are achieving their aims, reflecting changing circumstances nationally and locally given the uncertainty of the economy, the ability of the private sector to deliver, and Government austerity measures. The outcomes of the monitoring will be reported in the Authority's Monitoring Report, prepared to meet the requirements of Regulation 34 of the Town and Country Planning (Local Plan)(England) Regulations 2012. Green Belt should not be developed because there is alternative/sufficient brownfield sites available for development.	SD1.61	The Council plans to optimise the use of previously developed land in the urban areas where it is possible to do so in the first instance. The urban capacity is approximately 6,500-7,000 homes which would not meet the need for the Borough. The Council therefore undertook a Green Belt review which examined whether land currently designated as Green Belt continues to meet the purposes and aims for which it was first designated including whether it has prevented and continues to prevent urban sprawl. The proposed houses or a New Town, should be built elsewhere in the region/country.	SD1.63	Noted. The Local Planning Authority has a statutory duty to provide for its development needs in line with the Government's growth agenda, which impacts on an area wider than the Borough; such as the Thames Gateway, the East of England, the South East and the UK. The Council can only control what happens in their administrative area and the Council has a legal obligation to provide for the Borough's development needs. If the Borough could not accommodate its development needs, then under the Duty to Co-operate, as set out in the Localism Act 2011, the Council would have to ask neighbouring authorities to assist in helping meet the Borough's need. sustainable locations. The Site Allocations within the Draft Local Plan have been identified as the most appropriate locations for development which are suitable based on the findings of a range of studies taking into account infrastructure provision, the supply of suitable and deliverable sites, settlement hierarchy, and environmental and historic constraints. Policy SD2 specifically distributes a proportionate amount of growth to each of the main settlements, having regard to the capacity of the environment to accommodate such growth, and the ability to maintain the overall purpose of the Green Belt which is its openness and permanence.

The OAN is based upon the Council's deliberate strategy to accelerate economic growth.	SD1.79	The Government is pursuing an economic growth agenda in order to ensure that Britain has a stable, robust and competitive economy. Local Plans are expected to support this agenda by recognising and seeking to address potential barriers to investment, such as a poor environment or any lack of infrastructure, services or housing (paragraph 21 of the NPPF). This requirement has significant implications for the levels of growth identified in the Draft Local Plan. The Local Plan builds on the current spatial and policy context in which Basildon Borough sits, and in line with this, the Council has sought to articulate a vision for the future of the Borough, to be delivered through its plan and related strategies and programmes. Observations regarding wording changes to Policy SD 1, to emphasise that housing figures contained within criteria 2 and 3 are minimum requirements. It identified a number of areas within the Green Belt that were clearly performing their role in keeping the land permanently open, and also several areas that were identified as partly contributing to the function of the Green Belt. However this option was discounted in the absence of appropriate evidence from Brentwood, as it is not known if the proposal is the most appropriate option for their area. Land within the green belt should only be developed for affordable housing, with elements of control on how the houses are sold.	SD1.90	The NPPF requires Local Plans to be deliverable. Paragraph 173 states that the sites identified in the plan should not be subject to such a scale of obligations and policy burdens that their ability to be developed viably is threatened. It is agreed that the Council should provide housing which meets the needs of local people. Affordable Housing is specific types of housing defined in the NPPF. The SHMA has undertaken an assessment of the need for affordable housing and has determined that this need sits around 20-22% of the total housing requirement. In addition to this, there is a need for low cost ownership products to reduce pressure on the private rented sector. The proposed target of 25% in draft policy H34 enables this.	None required. <p>The natural environment and wildlife should be protected.</p>	<p>SD1.91</p>	<p>In line with Section 19 of the Planning and Compulsory Purchase Act 2004, the Council has carried out a 'sustainability appraisal' of the proposals in the Local Plan. This overlaps with some of the requirements in the Environmental Assessment of Plans and Programmes Regulations 2004, which gives effect to European Union Directive 2001/42/EC on the assessment of effect of certain plans and programmes on the environment. In addition, a Habitat Regulation Assessment is a requirement from the European Habitat Directive (92/43/EEC) and is necessary to assess the impact of the Local Plan's policies and proposals on sites of international importance. Both assessments make recommendations to the policies that the Council must take account of in the preparation of the Local Plan and its policies. Providing a high quality green infrastructure and a net gain in biodiversity will be integral to managing new development and change in the Borough. Through Policy NE 1 the Council seeks to work with partners to plan positively and deliver projects which create, protect, extend, enhance and manage the networks of green infrastructure and biodiversity, creating new habitats and providing links for wildlife and people. 		chapter and housing development policies H 7 -27.		
Object to the SA/SEA recommendations with regard to Alternative Option 4 of Policy SD 1.	SD1.92	Noted. The SA/SEA report has been prepared in line with good practice guidance. Table 1.1: Meeting the Requirements of the SEA Directive of the Main SA Report sets out where the various elements of the SEA Directive have been met. These will be met in full once the final Plan and SA/SEA Report ('the Environmental Report') are consulted on at publication stage. The assessments help to inform decisions on which development to take forward. Further mitigation and recommendations identified in the SA will be reviewed and taken forward as necessary during development of the next version of the Plan, alongside consultation comments and new evidence.	None required.	DLP/3070
The rate of vacant properties in the Borough is expected to reduce, which should therefore reduce the demand for new housing.	SD1.93	The Council will consider updating the evidence base in light of comments received.	Consider updating evidence base.	DLP/3043

<p>Objects to the methodology used in the Green Belt Review and considers it to be a misinterpretation of the importance of the five purposes of the Green Belt. Refers to the openness and permanence as being key characteristics of the Green Belt.</p>	<p>SD1.94</p>	<p>Objection to the approach noted. <p>The proposed pattern of development is not sustainable.</p>	<p>SD1.95</p>	<p>The NPPF sets out that the purpose of the planning system is to contribute to the achievement of sustainable development. There are three dimensions to sustainable development; economic, social and environmental. Section 19 of the Planning and Compulsory Purchase Act 2004 requires local planning authorities to carry out a 'sustainability appraisal' of the proposals in a Local Plan during its preparation. This overlaps with some of the requirements in the Environmental Assessment of Plans and Programmes Regulations 2004, which gives effect to European Union Directive 2001/42/EC on the assessment of effect of certain plans and programmes on the environment. Therefore, the Council has legally appraised the sustainability and environmental effects of proposals in the Local Plan. A Habitat Regulation Assessment is a requirement from the European Habitat Directive (92/43/EEC) and is necessary to assess the impact of the Local Plan's policies and proposals on sites of international importance.</p>	<p>None required.</p>	<p>DLP/345, DLP/2997, DLP/3082, DLP/5871,</p>

		Both assessments make recommendations to the policies that the Council must take account of in the preparation of the Local Plan and its policies.		
The Council will be unable to control development during the plan period.	SD1.96	The Local Plan will be monitored to provide crucial feedback into the process of plan-making in order to ensure that the Local Plan policies are being implemented and are achieving their aims, reflecting changing circumstances nationally and locally given the uncertainty of the economy, the ability of the private sector to deliver, and Government austerity measures. The outcomes of the monitoring will be reported in the Authority's Monitoring Report, prepared to meet the requirements of Regulation 34 of the Town and Country Planning (Local Plan)(England) Regulations 2012.	None required.	DLP/2997, DLP/3082, DLP/3172
The proposed Green Belt boundaries are not clearly defined.	SD1.97	Noted. The NPPF makes it clear that Green Belt boundaries should be robust and permanent. The proposed housing allocations and relief route to the south/south-west of Billericay are contrary to the findings of the Green Belt review.	SD1.98	Noted. Each Green Belt Review since 2011 has produced different results and could present loopholes for developers to take advantage of.	SD1.100	Noted. The NPPF requires local planning authorities to have an up-to-date and relevant evidence in place to inform the Local Plan. Much of the work done to prepare the Core Strategy remains relevant, and consequently has been used to inform the preparation of the Draft Local Plan. However, due to the additional detail required to allocate specific sites and to prepare development management policies, additional work on the evidence base has been necessary to provide the detail necessary to inform these policies. Furthermore, due to the passage of time, some evidence base work has had to be updated in order to ensure it still provides	The Council will keep this situation under review in the development of the Local Plan. 		sufficient justification for the strategic approach being taken and the overall need and distribution of growth. The Green Belt Study was undertaken between September 2012 and October 2013 and subsequently amended in 2015 following the public consultation on the Local Plan Core Strategy Revised Preferred Options Report between January and April 2014.		
The Council should consider having a separate policy for self-build homes outside the plotland areas.	SD1.101	Noted. New homes will be expected to respond to the projected needs of the Borough's residents and will include self-build and custom build homes as stated in Policy H 1, Housing Strategy.	Consider whether a separate policy is required for self-build homes.	DLP/3082, DLP/9891
The HELAA was based on outdated evidence.	SD1.102	The methodology for undertaking the HELAA has been altered to reflect the Government's introduction of the Planning Practice Guidance. The HELAA Methodology was formally adopted by the Council on 5 March 2015 and the HELAA Review is based on this revised methodology. The HELAA does not represent policy, neither does it determine whether a site should be allocated or granted permission for development. The HELAA simply determines which sites are currently considered suitable, available and achievable for potential housing and economic development. This information was then carried forward into the Local Plan process for consideration alongside other factors, such as the findings of other	None required.	DLP/3082

		evidence base documents and the Council's development strategy.		
New housing sites should make provision for open space.	SD1.103	The plan should be read as a whole. Through Policy HC 1 and associated IDP, the Council will seek to secure the provision, enhancement and maintenance of open space, sports and recreational facilities through planning conditions and/or developer contributions where there is a need created by the development, having regard to the Borough's local recommended standards of open space, playing pitch and indoor sports provision. Policies H7 to H29 identify the site specific infrastructure to be provided alongside individual developments. In addition, the Council has assessed some areas of Green Belt near the proposed new housing sites, where access restrictions can be lifted to turn such land into new 'strategic open spaces'. The provision of such accessible, useable green spaces will help ensure open space provision into the longer term.	None required.	DLP/3082DLPQQ/323

<p>Existing town centres/urban areas should be redeveloped to increase their densities and capacity for housing.</p>	<p>SD1.104</p>	<p>Noted. The NPPF requires Local Planning Authorities to identify key sites which are critical to the delivery of the housing strategy over the plan period, and states that significant development should be focused in sustainable locations. Evidence shows that there is a finite supply of suitable, available and achievable land within the urban areas. To accommodate more development using this land would require greater development densities to be adopted, and/or re-examining how other land is designated including open space to determine whether it could be converted into development allocations. This would lead to a greater concentration of development in urban areas and their associated pressures which will need managing within the same finite supply of land including parking, open space demands, and social requirements including education. This could therefore impact to a greater degree than is possible to mitigate on the liveability of the existing urban areas. It could potentially alter local character and is likely to lead to more of a mismatch between the type of development built, to the type that is needed in greater quantities (more flats, less family housing). In addition, a reduction in open space to accommodate growth will add greater pressure to remaining spaces, which whilst may be able to</p>	<p>None required.</p>	<p>DLP/345 DLP/368, DLP/1502, DLP/2290, DLP/3082, DLP/4786,</p>

		<p>be mitigated with investment, would reduce the extent to which the urban areas retain their relatively green character, particularly in Basildon (including Laindon and Pitsea) the former New Town. Evidence indicates that whilst there may be less impact on the Green Belt in quantitative terms, the qualitative social and economic consequences may not necessarily be more favourable if the Borough fails to meet the land requirements for the types of housing and economic development needed.</p>		
<p>Neighbouring authorities should take some of Basildon's housing needs due to Green Belt constraints within the borough.</p>	SD1.105	<p>Due to similar issues affecting the other authorities within the South Essex Housing Market Area, it has not been possible to resolve unmet housing needs through cross-boundary working. The Council therefore undertook a Green Belt review which examined whether land currently designated as Green Belt continues to meet the purposes and aims for which it was first designated including whether it has prevented and continues to prevent urban sprawl. This is in accordance with the requirements set out in Chapter 9 of the NPPF which was produced by national government.</p>	<p>The Council will keep this situation under review in the development of the Local Plan in the event any evidence or priorities change.</p>	DLP/3082

		Those areas that were found to only partly contribute or no longer contribute to these purposes were assessed by other studies on other matters as to whether development would be appropriate. The findings of all these studies combined informed the proposed site allocations in the Draft Local Plan.		
The Borough has been doing well without a Local Plan.	SD1.106	By law, Councils have to prepare Development Plans that set out a long-term blueprint for the future of their area.	None required.	DLP/2997
Development should be diverted to Basildon, Laindon, Pitsea and Wickford.	SD1.107	The Site Allocations within the Draft Local Plan have been identified as the most appropriate locations for development which are suitable based on the findings of a range of studies taking into account infrastructure provision, the supply of suitable and deliverable sites, settlement hierarchy, and environmental and historic constraints. Policy SD2 specifically distributes a proportionate amount of growth to each of the main settlements, having regard to the capacity of the environment to accommodate such growth, and the ability to maintain the overall purpose of the Green Belt which is its openness and permanence. <p>There has already been a lot of development in the past few years.</p>	<p>SD1.109</p>	<p>The plan already recognises that 678 homes were delivered in the period from the 1st April 2014 to the 31st March 2015, leaving a requirement for at least 14,582 homes to be delivered between 2015 and 2034. The Census 2011 shows that the population is increasing. There are more births than deaths as people are living longer. Local Planning Authorities have a statutory duty to provide for their development needs. The NPPF makes it clear that LPAs should plan positively to meet the development needs of the area, with sufficient flexibility to adapt to rapid change. One of the NPPF's Core Planning Principles is to meet the objectively assessed need for housing, business and other development needs of an area and respond positively to wider opportunities for growth. The Council has used its evidence base to distribute development in sites that are deliverable and can meet the objectively assessed need of the Borough. The distribution of development has considered the relative size of each settlement, so that the character and identity of the settlement is retained.</p>	<p>None required.</p>	<p>DLP/3045, DLP/5121DLPQQ/294, DLPQQ/440, DLPQQ/482, DLPQQ/506, DLPQQ/569</p>

Concerned about the loss of green spaces and recreational facilities.	SD1.110	The Site Allocations within the Draft Local Plan have been identified as the most appropriate locations for development which are suitable based on the findings of a range of studies taking into account infrastructure provision, the supply of suitable and deliverable sites, settlement hierarchy, and environmental and historic constraints. Proposes the area around Barleyland for development. <p>The proposed economic requirements are too ambitious or unjustified.</p>	<p>SD1.113</p>	<p>Noted. One of the NPPF's Core Planning Principles is to meet the objectively assessed need for housing, business and other development needs of an area and respond positively to wider opportunities for growth, including sustainable economic growth. The Employment Land and Premises Study (ELPS) describes how 49ha of employment land is required in order to serve and maintain the economic position of the Borough. This would provide around 8,600 jobs which is the middle of both the Experian and economic East of England Forecast Model, that suggest a need for 35,000 jobs within the Thames Gateway Area. The SHMA also examined the relationship between housing growth and employment growth re-affirming the need for around 16,000 homes over a 20 year period to support economic growth and address housing needs in Basildon Borough. This also includes any backlog and growth from London, which the Borough has a requirement to provide for in accordance with national policy. There should be another consultation following the publication of the SHMA targeted at the provision of new homes across the Housing Market Area.	SD1.116	Basildon does not currently have an overprovision of sites, and there has been no evidence to date to support the proposition that some unmet needs can be met within Basildon Borough. Following the consultation on the Draft Local Plan between 28 January to 24 March 2016, the responses received will be considered and used, where appropriate, to amend the Draft Local Plan. A final version of the Local Plan will be prepared for submission to the Planning Inspectorate for Examination in Public. This will be subject to a further period of consultation prior to submission, in accordance with Regulation 19 of the Town and Country Planning (Local Planning) (Regulations) 2012.	The Council will continue to seek proactive cooperation with other Greater Essex authorities at a Member and Officer level before the plan is finalised.	DLP/2800

The revised Green Belt boundaries should remain beyond the plan period.	SD1.118	The NPPF requires Local Plans to be drawn up over an appropriate time scale (typically over a period of 15 to 20 years), be kept up to date, and deliverable over the plan period. The Council will use the Authority Monitoring Report to provide up-to-date information on the implementation of the plan, and to determine whether there is a need to undertake a partial or full review of the Local Plan should monitoring identify that policies and allocations are not being achieved or are not in compliance with up to date policy. It is not possible to say what will happen after this plan ends as the planning system and legislation may have changed.	None required.	DLP/2800
The scale of housing growth proposed is not justified by evidence.	SD1.119	The Borough's future housing need is based on the findings of the Strategic Housing Market Assessment (SHMA) which was commissioned by the Council in partnership with neighbouring authorities. The SHMA sets out the objectively assessed need for the Borough, in line with the NPPF.	None required.	DLP/2971, DLPQQ/824

Development should not be phased.	SD1.120	The Draft Local Plan does not seek to phase development sites identified in this plan, except in cases where infrastructure is required in advance of development. It has however prepared a trajectory of supply, based on its understanding of development constraints, developer readiness and build rates. There is nothing in this plan which requires a developer to deliver in accordance with that trajectory providing the requirements of the relevant allocation policy are met.	The Council will keep this situation under review in the development of the Local Plan in the event any evidence or priorities change.	DLP/3044
Basildon town has the ability to take more growth within the Borough.	SD1.121	Policy SD2 specifically distributes a proportionate amount of growth to each of the main settlements, having regard to the capacity of the environment to accommodate such growth, and the ability to maintain the overall purpose of the Green Belt which is its openness and permanence. Approximately 61% of the growth within the Local Plan is planned within the Basildon area.	None required	DLP/3092, DLP/13447, DLPQQ/716
The projected growth does not take account of infilling.	SD1.122	The Council plans to optimise the use of previously developed land in the urban areas where it is possible to do so in the first instance. The urban capacity is approximately 6,500-7,000 homes which would not meet the need for the Borough. In addition, a review of the plotland settlements (Plotland Review (2015)) has identified Plotland Infill Areas with the potential to provide approximately 218 individual building plots in the future. This is	None required	DLP/3189

The evidence that informed the OAN is not up-to-date.	SD1.123	The Borough's future housing need is based on the findings of the Strategic Housing Market Assessment (SHMA) which was commissioned by the Council in partnership with neighbouring authorities and formally published in May 2016. The evidence presented in the SHMA (2016) has been structured around the methodological steps set out within the PPG for assessing housing need, using the analysis to arrive at a recommended objective assessment of need (OAN) range for Basildon Borough, in compliance with the PPG and the NPPF. <p>Seeks further clarification on the assumptions that led to the use of the lower end of the OAN range as baseline for the draft Local Plan.</p>	SD1.125	<p>The Council has given consideration to the range of housing need identified in the SHMA. The level of growth represented by the lower end of the range of OAN is sufficient to address uncertainties arising around the participation of older people in the economy, by ensuring that Office of Budget Responsibility assumptions can be met within the resident labour supply. This level of growth also aligns with the GLA Central Scenario, thereby accommodating increased levels of out-migration from London than is otherwise captured in the 2012-based SNPP. The upper end of the OAN range applies very conservative assumptions around the participation of older people in the economy, which is not supported by the Office of Budget Responsibility. The Council should consider producing joint planning policies on strategic matters with neighbouring authorities.	SD1.131	Essex County Council (ECC) is responsible for planning issues relating to strategic planning that are likely to have an impact across the whole of Essex and its sub-regions. It is not clear whether the Council have included any shortfall in housing, prior to adoption of the Local Plan, in the calculation of its OAN.	SD1.132	The OAN has been calculated using a 2014 baseline. <p>Objects to the Council's approach to meet all of its housing need.</p>	<p>SD1.139</p>	<p>The Borough's future housing need is based on the findings of the Strategic Housing Market Assessment which was commissioned by the Council in partnership with neighbouring authorities. Policy restrictions, such as Green Belt can be a factor in determining the housing target for an area and this has been considered by the Council where it would be unable to accommodate all of its OAN within the urban area. A sustainability appraisal report has been prepared, which assesses the relative merits of different levels of growth. That appraisal, prepared independently of the Council, concludes that the level of growth set out in the Draft Local Plan is the most sustainable, generating benefits across a range of social, environmental and economic indicators. Lower levels of growth would not result in such sustainable outcomes. Poor outcomes in terms of the economy or social welfare provide justification for not pursuing lower levels of growth, and consequently for accommodating some development in the Green Belt.</p>	<p>None required.</p>	<p>DLP/12127, DLP/12156, DLP/12182, DLP/12198, DLP/12219, DLP/12232, DLP/12262, DLP/12276, DLP/12284, DLP/12285, DLP/12295, DLP/12305, DLP/12313, DLP/12320, DLP/12327, DLP/12334, DLP/12350, DLP/12356, DLP/12361, DLP/12374, DLP/12395, DLP/12413, DLP/12416, DLP/12433, DLP/12443, DLP/12451, DLP/12464, DLP/12465, DLP/12486, DLP/12501, DLP/12508, DLP/12530, DLP/12548, DLP/12566, DLP/12576, DLP/12588, DLP/12595, DLP/12603, DLP/12617, DLP/12624, DLP/12632, DLP/12639, DLP/12646, DLP/12653, DLP/12654, DLP/12663, DLP/12673, DLP/12674, DLP/12690, DLP/12704, DLP/12709, DLP/12722, DLP/12735, DLP/12749, DLP/12751, DLP/12762, DLP/12775, DLP/12778, DLP/12787, DLP/12803, DLP/12827, DLP/12857, DLP/12863, DLP/12867, DLP/12882, DLP/12903, DLP/12918, DLP/12929, DLP/12943, DLP/12962, DLP/12973, DLP/12979, DLP/13010, DLP/13028, DLP/13037, DLP/13062, DLP/13087, DLP/13095,</p>

The saved policies of the Basildon District Local Plan (1998) which sets out the Borough's current Green Belt boundaries remain part of the Development Plan against which planning applications are assessed, until such time as they have been superseded by adopted policies in the new Local Plan. Land earmarked for commercial/industrial uses should be used instead for housing.	SD1.148	A key principle underpinning the Government's sectoral approach to land supply modelling is to reflect employment sectors which are likely to have prospects for better success in the future, in terms of generating increased value and employment to the UK economy. This approach would support the Basildon Employment Land and Premise Study (ELPS) demand led approach to forecasting future need for employment land over the plan period. The supply-demand balance analysis contained in the ELPS has shown that the Borough is well placed to meet many of the Borough's employment needs that are anticipated over the plan period. The proposed level of provision is assessed to be compliant with the NPPF as it pro-actively encourages sustainable economic growth and inward investment to the Borough, as well as supporting Basildon's role as an economic and business hub. The SHMA builds on work undertaken for Greater Essex authorities on demographic forecasting, and on economic forecasting undertaken for the East of England group of authorities using the East of England Forecasting Model to understand the local drivers of housing need in South Essex. It has carefully considered and tested the most up to date evidence available on population projections (including birth and death rates, internal migration and international migration), changing age profiles, household formation rates, household size, employment rates, economic forecasts, housing market activity, affordability, vacancy rates, occupation ratios and the Borough's relatively close proximity to Greater London to determine what the objectively assessed need for housing in South Essex is.</p>	<p>None required.</p>	<p>DLPQQ/122, DLPQQ/995</p>

The Plotland Infill Areas were informed by the Plotland Study (2015) which undertook an assessment of each of the 13 Plotland areas to identify their potential for development which would not harm the openness of the Green Belt. The study was informed by the HELAA, as well as desktop assessments and site visits. Not all land parcels within these plotland infill areas will meet the criteria, having identified the potential to provide approximately 218 individual building plots in the future.</p>	<p>None required</p>	<p>DLPQQ/11</p>

The Green Belt Study looked at how the Borough's current Green Belt performed against the five purposes and contributed to the openness of the Green Belt. Paragraph 173 states that the sites identified in the plan should not be subject to such a scale of obligations and policy burdens that their ability to be developed viably is threatened. It is agreed that the Council should provide housing which meets the needs of local people. The SHMA identifies the range of house sizes needed to meet local needs. This includes a proportion of smaller 1 and 2 bedroom homes as well as large homes needed to meet the needs of families. Part 1 of policy H33 requires regard to be had to these requirements when planning the housing mix on development sites. Concerned about the loss of countryside as a result of proposed development.	SD1.157	The OAN for housing is greater than the capacity of the urban area, which has meant that land within the current extent of the Green Belt has been identified for housing purposes. It is noted that this will have some impact on the Countryside. However, in order to identify sites which would minimise harm to the landscape, Outline Landscape Appraisals have been undertaken to identify developable areas within those sites promoted for development. There is no mechanism at present to re-distribute growth and therefore it must be decided at the local level. Population growth will be significantly higher than is proposed in the plan.	SD1.162	The evidence presented in the SHMA has been structured around the methodological steps set out within the PPG for assessing housing need, using the analysis to arrive at a recommended objective assessment of need (OAN) range for Basildon Borough, in compliance with the PPG and the NPPF. The Local Plan will be monitored to provide crucial feedback into the process of plan-making in order to ensure that the Local Plan policies are being implemented and are achieving their aims, reflecting changing circumstances nationally and locally given the uncertainty of the economy, the ability of the private sector to deliver, and Government austerity measures. The outcomes of the monitoring will be reported in the Authority's Monitoring Report, prepared to meet the requirements of Regulation 34 of the Town and Country Planning (Local Plan)(England) Regulations 2012. <p>By granting planning permission to green belt developments, the Local Plan would set a precedent for future development within the green belt.</p>	<p>SD1.163</p>	<p>Noted. Preparing a Local Plan and applying for planning permission are two separate processes; albeit that they both deal with land or development in the Borough. Planning applications are determined in accordance with the Development Plan, which was adopted by the Council in 1998. The saved policies of the Basildon District Local Plan (1998) which sets out the Borough's current Green Belt boundaries remain part of the Development Plan against which planning applications are assessed, until such time as they have been superseded by adopted policies in the new Local Plan. In accordance with national planning policy, the LPA must consider whether its Green Belt boundaries need to be adjusted through the review of the Local Plan in order to allocate enough land to meet those needs. The Council is currently reviewing its Local Plan to determine whether or not it needs to be updated given the Borough's various development needs. At this time, the Council is proposing to review the Green Belt boundaries to provide more land to meet its development needs. It is also proposing to change Green Belt policy in future and allow limited infill development in vacant plots within the Plotlands. These are however still currently just proposals, which are subject to public consultation and examination. Final</p>	<p>None required.</p>	<p>DLPQQ/454</p>

Proposals within the local plan conflict with the plans of Parish and Town Councils for the area.	SD1.164	There are currently no adopted Neighbourhood Development Plans or Neighbourhood Development Orders in the Borough, however the Council has formally designated the Hovefields and Honiley Neighbourhood Area and the Bowers Gifford and North Benfleet Neighbourhood Area. As stated within the plan, the Local Plan may be further supplemented by Neighbourhood Plans, prepared by Local Councils or Neighbourhood Forums over the plan period, in accordance with the Localism Act 2011. These could set out additional planning policies for the management of development in smaller, distinctive localities, in accordance with the Local Plan. The Council intends to support the Local Councils or Neighbourhood Forums as they take steps to prepare Neighbourhood Plans or Orders.	None required.	DLPQQ/454

Disproportionate distribution of additional employment across the Borough which doesn't align with the proposed housing. Those areas that were found to only partly contribute or provide limited contribution to these purposes were assessed by other studies on whether development would be appropriate. Understand the need for more housing but should avoid building on Green Belt.	SD2.25	The Council plans to optimise the use of previously developed land in the urban areas where it is possible to do so in the first instance. The urban capacity is approximately 6,500-7,000 homes which would not meet the need for the Borough and would have adverse social and economic impacts. The Council therefore undertook a Green Belt review which examined whether land currently designated as Green Belt continues to meet the purposes and aims for which it was first designated. This is in accordance with the requirements set out in Chapter 9 of the NPPF which was produced by national government. Those areas that were found to only partly contribute or provide limited contribution to these purposes were assessed by other studies on other matters as to whether development would be appropriate. Should be a lower quantum of housing in Billericay	SD2.26	The Borough's future housing need is based on the findings of the Strategic Housing Market Assessment (SHMA) which was commissioned by the Council in partnership with neighbouring authorities. The SHMA sets out that the objectively assessed need for the Borough, in line with the NPPF, should be in the region of 15,260 to 16,740 homes in the period 2014 to 2034. Therefore, the Council will	None required.	DLP/958, DLP/1398, DLP/3804, DLP366, DLPQQ/846, DLPQQ/585

The Site Allocations within the Draft Local Plan have been identified as the most appropriate locations for development in each settlement based on the findings of a range of studies taking into account infrastructure provision, the supply of suitable and deliverable sites, and environmental and historic constraints.

<p>Concerned about further development in Wickford due to impact on community facilities and transport infrastructure capacity.</p>	<p>SD2.27</p>	<p>Paragraph 47 of the NPPF states that Local Plans should plan to meet the full, objectively assessed need for housing. Paragraph 159 confirms that such calculations of need should include both migration and demographic change. This is confirmed within the Planning Practice Guidance. The approach to calculating OAN for housing within the Planning Practice Guidance has been applied in the South Essex SHMA 2016. This identifies the need for housing in Basildon Borough, and forms the basis for the target in the Draft Local Plan. Infrastructure requirements set out in chapters 9 and 13 reflect the growth associated with this level of housing provision. Disproportionate amount of housing and gypsy/traveller sites in Wickford.	SD2.38	Paragraph 47 of the NPPF requires Local Planning Authorities to identify key sites which are critical to the delivery of the housing strategy over the plan period while Paragraph 17 states that significant development should be focused in sustainable locations. The site allocations for housing within the Draft Local Plan have been identified as the most appropriate locations for development based on the findings of a range of studies taking into account infrastructure provision, the supply of suitable and deliverable sites and environmental and historic constraints. Approximately 61% of the growth within the Draft Local Plan is planned within Basildon which is the largest proportion. More detailed outline landscape appraisals were also undertaken for potential sites which assessed development potential of smaller parcels of land than those initially assessed in the Green Belt and Landscape studies. However the Council will keep this situation under review in the development of the Local Plan in the event any evidence or priorities change.	Review if changes to the evidence base arise. Concerned about further development in Ramsden Bellhouse due to loss of Green Belt land. Brownfield sites should be used instead.	SD2.63	Concern noted. However, in order to meet the OAN for housing, as set out in policy SD1, it is necessary for approximately 8,500 homes to be provided in the Green Belt. The Council undertook a Green Belt review which examined whether land currently designated as Green Belt continues to meet the purposes and aims for which it was first designated. This is in accordance with the requirements set out in Chapter 9 of the NPPF which was produced by national government. Those areas that were found to only partly contribute or provide limited contribution to these purposes were assessed by other studies on other matters as to whether development would be appropriate. The findings of all these studies combined informed the proposed site allocations in the Draft Local Plan. Impact on the Green Belt has been minimised by identifying all reasonable sources of urban land supply. The urban capacity is only 6,500 - 7,000 homes.	None required.	DLP/1784
Phase 1 Habitats Survey (2005) is out of date and requires updating.	SD2.64	Noted. The Council will review the evidence base in light of comments received.	Review the evidence base.	DLP/2236DLPQQ/674
Billericay, Wickford and Basildon all have facilities and services to be sustainable and therefore it is appropriate that Billericay provides a proportion of the housing growth.	SD2.65	Support for SD2 noted.	None required.	DLP/2026

<p>Large amount of growth planned for Basildon including Dunton village. Questions whether it is reflective of natural growth.</p>	<p>SD2.66</p>	<p>In Basildon, natural change has consistently been the main driver of population growth. This alone gives rise to the need for an extra 550 homes per year within the Borough over the plan period. Paragraph 47 of the NPPF states that Local Plans should plan to meet the full, objectively assessed need for housing. Paragraph 159 confirms that such calculations of need should include both migration and demographic change. This is confirmed within the Planning Practice Guidance. The objectively assessed need for housing in Basildon Borough has been calculated and forms the basis for the target in the Draft Local Plan. Basildon is recognised as a larger urban area in the Borough's Settlement Hierarchy compared to Wickford and Billericay with a different development history and access to a fuller range of services. Numerous studies have informed the growth and site allocations proposed within each settlement taking into account infrastructure provision, the supply of suitable and deliverable sites, and environmental and historic constraints. Approximately 61% of the growth within the Local Plan is planned within Basildon which represents a proportionate amount of growth based on what Basildon can accommodate.</p>	<p>None required.</p>	<p>DLP/2269DLPQQ/626</p>

The Sustainability Appraisal map shows more sites than those proposed on the Policies Map. Questions why a number have been discounted around Billericay as it should provide more.	SD2.70	The Sustainability Appraisal provides the background context through which areas and sites have been considered during the preparation of the Local Plan. The Site Allocations within the Draft Local Plan have been identified as the most appropriate locations for development of all those considered. They are suitable based on the findings of a range of studies taking into account infrastructure provision, the supply of suitable and deliverable sites, and environmental and historic constraints. Sites that are not within the Draft Local Plan are either less sustainable or were not found to be suitable based on the evidence. The Council has set out the overall housing target across the Local Plan period from 2014 to 2034 which includes a proportion which has already been met by completed development and planning permission and this has been explained within the Draft Local Plan. The number of houses being proposed adjacent to Wickford (Chelmsford City Council and Rochford District Council) is unsustainable.	SD2.100	All Local Planning Authorities have a statutory duty to prepare their own local plans and go as far as is reasonably possible in meeting their own development needs in line with the Government's growth agenda. The Council can only control what happens in their administrative area and the Council has a legal obligation to provide for the Borough's development needs. The Borough's future housing need is based on the findings of the Strategic Housing Market Assessment (SHMA) which sets out that the objectively assessed need for the Borough, in line with the NPPF, should be in the region of 15,260 to 16,740 homes in the period 2014 to 2034. Therefore, the Council will seek to meet the overall objectively assessed need for at least 15,260 homes within Basildon Borough over the plan period. In preparing its Infrastructure Delivery Plan, the Council has worked with a number of infrastructure providers to understand the current position within the Borough and what further infrastructure requirements will be needed to support additional growth. Each of the infrastructure providers have taken into consideration growth within the Borough and outside to provide an accurate picture of what the future needs will be.

Recommends redistributing growth to the A127.	SD2.110	Consideration was given through the plan-preparation process to a number of potential development sites in the vicinity of the A127 and those sites which were found sustainable, such as land west of Basildon (H10), land west of Steeple View (H11), land east of Noak Bridge (H12) have been allocated within the Local Plan. Evidence base work which included Outline Landscape Appraisals, Sustainability Appraisal and Sequential Flood Risk Assessment found that these development locations, and those identified around Billericay, were appropriate having regard to reasonable alternatives nearby. A sustainability appraisal report has been prepared, which assesses the relative merits of different levels of growth. That appraisal, prepared independently of the Council, concludes that the level of growth set out in the Draft Local Plan is the most sustainable, generating benefits across a range of social, environmental and economic indicators. Lower levels of growth would not result in such sustainable outcomes. Infrastructure requirements set out in chapters 9 and 13 reflect the growth associated with this level of housing provision.
