# INTRODUCTION

- 1.1 This report provides an update to the Basildon Council Five Year Land Supply Report 2018 -2023 published in November 2018. This 5 Year Report March 2019 update is in response to the new National Planning Policy Framework (NPPF) published in February 2019 and the new Planning Practice Guidance (PPG) on calculating housing needs issued by the Government on 20 February 2019. The new PPG now requires the use of 2014 based household projections when calculating housing needs, moving away from the 2016 based projections used in the 5 Year Nov 2018 report.
- 1.2 The National Planning Policy Framework (NPPF) requires local planning authorities to identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement.
- 1.3 Paragraph 60 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance. Paragraph 212 states that the policies in the NPPF 2019 are material considerations which should be taken into account in dealing with applications from the day of its publication.
- 1.4 For the purposes of the emerging local plan submitted and awaiting examination, an alternative 5 Year housing supply position has been calculated using policies and housing supply trajectory in the Revised Publication Local Plan 2014-2034. This is referred to below as the 5 year Housing Requirement for Strategic Planning Purposes.
- 1.5 This statement sets out Basildon Council's land supply position and highlights how this has been calculated
- 1.6 For the purposes of dealing with planning applications, a 5 Year housing supply position has been calculated using the new standard methodology available within national planning guidance. This will be referred to in this document as the 5 year Housing Requirement for Planning Applications.
- 1.7 For the purposes of submitting the local plan for examination, a 5 Year housing supply position has been calculated using has been calculated using policies and housing supply trajectory in the Revised Publication Local Plan 2014-2034.

# HOUSING REQUIREMENT FOR PLANNING APPLICATIONS

## CALCULATING THE MINIMUM ANNUAL LOCAL HOUSING NEED FIGURE USING THE STANDARD METHOD?

- 1.8 Paragraph 60 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method<sup>1</sup> in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.
- 1.9 The methodology in the Planning Practice Guidance follows a 3 stage approach for calculating the minimum annual local housing need figure and has been used below to calculate the figure for Basildon Borough.

### STAGE 1: SETTING THE DEMOGRAPHIC BASELINE

- 1.10 The most recent PPG updated on 20 February 2019 states that the baseline should be set using the 2014 Household Projections. The 2014 based ONS Household Projections identify a need for around 760 homes per year in Basildon Borough.
- 1.11 (Government's household projections) – Annual average household growth over a 10 year period

$$87,106 - 79,509 / 10\text{years} = 760$$

### STAGE 2: ADJUSTMENT TO TAKE ACCOUNT OF AFFORDABILITY

- 1.12 An adjustment has to be applied to the average annual projected household growth figure (760) based on the affordability of the area using the most recent median workplace-based affordability ratios, published by the Office for National Statistics at a local authority level. The median workplace-based affordability ratio for Basildon Borough is 10.48.

$$\text{Adjustment factor} = (10.48 - 4/4) \times 0.25 = 0.4$$

$$\text{Minimum annual local housing need figure} = (1 + 0.4) \times 760 = 1,064$$

### STAGE 3: CAPPING THE LEVEL OF ANY INCREASE

---

<sup>1</sup> <https://www.gov.uk/guidance/housing-and-economic-development-needs-assessments>

- 1.13 A cap may then be applied which limits the increase in the minimum annual housing need figure an individual local authority can face. The level of any increase is capped dependent on the status of the local plan in each authority.
- 1.14 For those authorities who have adopted a local plan in the last five years, the housing need figure should be capped at 40% above the annual requirement figure currently set out in their local plan.
- 1.15 For those authorities with a local plan which was adopted more than five years ago, the housing need figure is capped at 40% above whichever is the higher of the household projection or annual housing requirement in the local plan.
- 1.16 Basildon Council's adopted local plan is more than 5 years old and does not have an adopted housing requirement figure.
- 1.17 In December 2014, the Council alongside the four other South Essex LPAs commissioned Turley Associates and Edge Analytics to update the Thames Gateway South Essex Strategic Housing Market Assessment (SHMA) which will for the first time establish the OAN for the whole South Essex sub-region and update the OAN for the component LPAs. The SHMA was published in May 2016. The SHMA was based upon the most up-to-date data available at the time, the 2012-based household projections.
- 1.18 Following the release of the 2014-based projections in May and July 2016 and the availability of the emerging findings from the EDNA, the SHMA was updated by the Addendum to the SHMA May 2017. The addendum, however, does not represent a comprehensive update of all elements of the SHMA, and is intended to be read alongside the earlier document. It provides an updated OAN which reflects a series of positive adjustments to the new demographic 'starting point' provided by the 2014-based sub-national population projections.
- 1.19 The SHMA Addendum 2017<sup>2</sup> shows an OAN requirement of between 972 – 986 dwellings per annum, a total of 19,440 – 19,720 dwellings over the plan period 2014 -2034. However, the SHMA has not yet been independently examined in any plans in the South Essex Housing Market Area. Therefore, the SHMA Addendum 2017 OAN will not be used as the baseline to update this year's Basildon Borough Five Year Land Supply requirement for planning applications.
- 1.20 The capping that is therefore applied for Basildon Borough's minimum annual housing need figure is calculated as follows:
- There is no average annual housing requirement figure in the existing local plan policies.
  - Average annual household growth over ten years is 760
  - The minimum annual local housing need figure is 1,064
  - The cap is set at 40% above the higher of the most recent average annual housing requirement figure or household growth:

---

<sup>2</sup> <https://www.housingessex.org/topic/evidence-base/>

**Cap = 760 + (40% x760) = 1,064**

- 1.21 The capped figure is the same as the minimum annual local housing need figure and therefore the minimum figure for Basildon Council is 1,064.

#### PART A: CALCULATING PAST HOUSING REQUIREMENT

- 1.22 Paragraph 60 of the NPPF states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals.
- 1.23 The local housing need assessment calculations are based on the most recent Sub National Household Projections (SNPP) and the latest projections were published in September 2018, as a result the consequences of any previous shortfall in delivery against the former Regional Spatial Strategy target (the last target subject to independent examination and testing) within the Basildon Borough is already captured. Therefore any shortfall in delivery prior to this year has been removed from the calculation.
- 1.24 Part A to C of the calculations which deals with the shortfall from previous years applied in calculating the 5 year Land Supply position for strategic purposes below will not be applied here.

#### PART D: FUTURE HOUSING REQUIREMENT

- 1.25 Paragraph 60 of the NPPF 2019 states that to determine the minimum number of homes needed, strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach which also reflects current and future demographic trends and market signals. The minimum annual local housing need figure for Basildon is 1,064 and therefore the future housing requirement is 5,320 dwellings over the next 5 years.

**Summary: 1,064 dwellings x 5 years = 5,320 dwellings**

#### PART E: THE 20% BUFFER

- 1.26 The NPPF expects local planning authorities to provide a sufficient land buffer within their five year supply to create flexibility within the markets for housing and land. It expects a minimum buffer of 5% to be provided to ensure choice and competition in the market for land.

- 1.27 It expects 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year.
- 1.28 This is expected to be increased to 20% in areas where there has been significant under delivery of housing over the previous three years.
- 1.29 In the previous 3 years Basildon Borough Council has delivered 1569 dwellings (Appendix A) which is significantly less than the 3,192(1,064 x 3) of dwellings expected. Therefore in accordance with the NPPF, a 20% buffer should be applied to the five year housing land supply calculation for Basildon Borough.

**Summary: 20% buffer = 1,064 x 5 years / 20% = 1,064 dwellings**

## PART F: TOTAL FIVE YEAR HOUSING REQUIREMENT

- 1.30 The total requirement for housing within the next five years is the total of Part C - the shortfall, Part D - the future need for housing and Part E - the buffer.

**0 + 5,320 dwellings + 1,064 dwellings = 6,384dwellings**

**Summary: 6,384 / 5 years = 1,277 dwellings per annum**

# HOUSING REQUIREMENT FOR STRATEGIC PURPOSES

## PART A: CALCULATING PAST HOUSING REQUIREMENT

- 1.31 The National Planning Policy Framework (NPPF) states that local planning authorities should boost significantly the supply of housing by ensuring the Local Plan meets the full, objectively assessed needs for market and affordable housing.
- 1.32 In the absence of an adopted Local Plan which sets out the full objectively assessed needs for the Borough, Planning Practice Guidance (PPG) states that
- 1.33 *“Where evidence in Local Plans has become outdated and policies in emerging plans are not yet capable of carrying sufficient weight, information provided in the latest full assessment of housing needs should be considered. But the weight given to these assessments should take account of the fact they have not been tested or moderated against relevant constraints. Where there is no robust recent assessment of full housing needs, the household projections published by the Department for Communities and Local Government should be used as the starting point, but the weight given to these should take account of the fact that they have not been tested (which could evidence a different housing requirement to the projection, for example because past events that affect the projection are unlikely to occur again or because of market signals) or moderated against relevant constraints (for example environmental or infrastructure)”.*
- 1.34 In March 2019 Basildon Borough Council submitted its Revised Publication Local Plan 2014-2034 for Examination in Public. The Revised Publication Local Plan sets out a housing target for the 20 year plan period of 15,465 homes. As of 31/03/2018 2,247 homes had been delivered against this target. The Revised Publication Local Plan sets out a staged housing target to make provision for at least 13,218 by 2034.

Time Period	Up to 2023	2023-2028	2028-34
Homes Per Annum	622pa	688pa	1,111pa

- 1.35 Therefore for strategic purposes the past housing requirement is comprised of 2,247 homes delivered between 01/04/2014 to 31/03/2018 and the 622 homes to meet the required in 2018/19 (2,869 homes)

**Summary: 2,247 dwellings (01/04/2014 to 31/03/2018) + 622 dwellings (2018/19) = 2,869**

## PART B: COMPLETIONS

- 1.36 Since 2014, a total of 2,587 dwellings have been delivered within Basildon Borough, as set out in

1.37 APPENDIX A.

**Summary: 2,587 dwellings**

**PART C: SHORTFALL (THIS IS THE LAST 4 YEARS PERFORMANCE AGAINST THE 972 TARGET)**

1.38 The need for housing in the past, compared to the number of completions over the same period, results in a shortfall of 282 dwellings against the target. The Planning Practice Guidance indicates that this backlog should be addressed as soon as possible within the future supply of housing and consequently, it is expected that this shortfall is added to the five year housing land supply requirements (known as the Sedgefield Approach).

**Summary: 2,869 dwellings minus 2,587 dwellings = 282 dwellings shortfall**

**PART D: FUTURE HOUSING REQUIREMENT**

1.39 As stated in Part A, the NPPF requires local planning authorities to meet fully their objectively assessed needs. This is supported by paragraph 31 of the PPG, which states:

1.40 *“Considerable weight should be given to the housing requirement figures in adopted Local Plans, which have successfully passed through the examination process, unless significant new evidence comes to light. It should be borne in mind that evidence which dates back several years, such as that drawn from revoked regional strategies, may not adequately reflect current needs.”*

1.41 The Revised Publication Local Plan sets out a staged housing target to make provision for at least 13,218 by 2034.

Time Period	Up to 2023	2023-2028	2028-34
Homes Per Annum	622pa	688pa	1,111pa

1.42 In the period from 2019 to 2024, there is, therefore, a requirement for sufficient land to be made available to accommodate a minimum of 3,176 homes. This does not include the shortfall calculated separately under part C.

**Summary: 622 dwellings pa x 4 years + 688 dwellings pa x 1 year = 3,176 dwellings**

**PART E: THE 20% BUFFER**

- 1.43 The NPPF requires a 20% buffer to be added to a Local Planning Authorities five year land supply if housing delivery falls below 85% of the requirement set by the Housing Delivery Test.
- 1.44 In February 2019 Basildon Borough delivery rate was reported at 75% against the number of homes required, based on the number of homes delivered in the Borough over the 3 year period between 2015-16 and 2017-18. Therefore, a twenty percent buffer must be added to the five year land supply.

**Summary: 20% buffer = 3,176 +20% = 635 dwellings**

## PART F: TOTAL FIVE YEAR HOUSING REQUIREMENT

- 1.45 The total requirement for housing within the next five years is the total of Part C - the shortfall, Part D - the future need for housing and Part E - the 20% buffer.

**282 dwellings + 3,176 dwellings + 635 dwellings = 4,093 dwellings**

**Summary: 4,093 / 5 years = 819 dwellings per annum**

# HOUSING SUPPLY

## PART G: HOUSING SUPPLY

- 1.46 Paragraph 67 of the NPPF 2019 states that Strategic policy-making authorities should have a clear understanding of the land available in their area through the preparation of a strategic housing land availability assessment. From this, planning policies should identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability.
- 1.47 It further states that planning policies should identify a supply of:
- specific, deliverable sites for years one to five of the plan period<sup>32</sup>; and
  - specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15 of the plan.
- 1.48 *The NPPF 2019 Glossary states that “To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. Sites that are not major development, and sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (e.g. they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans). Sites with outline planning permission, permission in principle, allocated in the development plan or identified on a brownfield register*

*should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.”*

- 1.49 Paragraph: 018<sup>3</sup> of the PPG identifies that deliverability of 1-5 years in relation to housing supply should be determined through assessing the suitability, availability and achievability. The assessment will provide information as to whether a site can be considered deliverable and developable.
- 1.50 The Council has carried out a comprehensive and detailed analysis of all sites included within the five year land supply to scrutinise and demonstrate that the five year land supply is based on robust deliverable sites.
- 1.51 This has included the application of a standard formula to assess the build rates and the lead in times for all sites that are capable of contributing to the five year supply within Basildon Borough. The assumptions for build rates and lead-in times applied by the Council is shown in Table 1 below. The formula has been developed using various evidence available to the Council, including a specific analysis of historical build rates within the Borough. The formula has been applied to all sites currently under construction, sites that have full planning permission and sites with outline planning permission.
- 1.52 The formula has also been applied to some of the sites that are considered to be suitable, available, or achievable that are part of the most up to date Housing and Economic Land Availability Assessment (HELAA). However, some of the sites, which have been considered to meet these criteria, could only come forward as a result of releasing Green Belt land as part of the site allocation process in the emerging Local Plan. As the Council is not scheduled to adopt the emerging Local Plan until 2019, for the purposes of the five year land supply, the approach used has been to split the suitable, available and achievable sites contained within the HELAA into two categories (unconstrained supply and constrained supply) to ensure only those sites which are deliverable within a five year period contribute to the Council's housing supply.
- 1.53 The first category of HELAA sites are considered to be deliverable now, and capable of contributing to the five year supply as they are situated within the existing urban area and hence do not require a policy change (i.e. Green Belt release) through the adoption of the Local Plan to allow them to come forward.
- 1.54 The second category of HELAA sites are taken from the emerging Local Plan's proposed strategic housing allocations and are not included in the quantum of housing land supply expected to come forward within the next five years. These have been placed outside the five year housing supply period, as they are not considered to be able to be relied upon and therefore deliverable until Green Belt changes and allocation policies are decided by the Local Plan.

---

Table 1: Build rates and lead-in times

Standard build rates and lead-in times									
	Site Size / Number of Dwellings								
Site Status		1 -20 Dwellings	21 - 50	51 -200	201 - 500	501 - 1000	1001 - 2000	2001+	Notes
Under construction	Commencement Year	Year 1	Year 1	Year 1	Year 1	Year	Year 1	Year 1	Sites where construction has commenced
	Build Rate (per annum)	10	20	30	50	75	100	150	
Full Planning Permission / Reserved Matters	Commencement Year	Year 1	Year 1	Year 1 ( 15) , Year 2 (30)	Year 2	Year 2	Year 2	Year 2	Allows for discharge of conditions and infrastructure provision on larger sites
	Build Rate (per annum)	10	20	30	50	75	100	150	
Outline Planning Permission	Commencement Year	Year1.5	Year 2	Year 2	Year 2 (25), Year 3 (50)	Year 2 (35), Year 3 (75)	Year 2(50), Year 3(100)	Year 2(50), Year 3 (100)	Allows full permission/ Reserved matters and for discharge of conditions and infrastructure provision.
	Build Rate (per annum)	10	20	30	50	75	100	150	
Urban HELAA Site	Commencement Year	Year 3	Year 3	Year 4	Year 4 (25), Year 5 (50)	Year 4(35), Year 5 (75)	Year 4 (50), Year 5 (100)	Year 4 (50), Year 5 (100)	Allows for planning permission and for larger sites allows full permission/ Reserved matters, discharge of conditions and infrastructure provision.
	Build Rate (per annum)	10	20	30	50	75	100	150	
Strategic HELAA Site	Commencement Year	Year 6	Year 6	Year 7	Year 8 (25), Year 9 (50)	Year 9 (35), Year 10 (75)	Year 9 (50), Year 10 (100)	Year 9 (50), Year 10 (100)	Allows for change of Policy. After Policy change, allows for planning permission and for larger sites allows full permission/ Reserved matters, discharge of conditions and infrastructure provision.
	Build Rate (per annum)	10	20	30	50	75	100	150	
									* Slower build rate at beginning of construction on larger sites due to construction start up.

\*Strategic sites that require significant infrastructure investment in order to mitigate the impact of growth have been placed beyond Year 10

- 1.55 At 31st March 2019, the Residential Land Availability (RLA) showed a total of 2,918 net additional dwellings with planning consent, which were either extant or under construction, but yet to be completed. A review of the extant consents was undertaken to determine whether or not they were likely to be delivered. A total of 408 dwellings were then removed from the five year land supply, as there remained uncertainty as to whether these sites would come forward within 5 years. It is considered that this process of review and discounting has made the five year housing land supply calculation more robust.
- 1.56 Sites that contribute to supply for the next five years (2019-2024) are set out in Appendix B and C. The supply is made up of sites that have planning consents already in place and are considered deliverable within five years, sites which are contained in the HELAA located in the urban area and are therefore not constrained by Green Belt policy and considered suitable, available and achievable. Sites that contribute to supply for the next five years also include known sites identified for Town Centre regeneration.

(1) Planning Consents = 1,918 dwellings

(2) HELAA Sites = 913 dwellings

(3) Town Centre Regeneration = 170 dwellings

**Summary: Total Supply = 3001 dwellings**

## 5 YEAR LAND SUPPLY POSITION

- 1.57 The current total supply of housing for the next five years is therefore 3,001 dwellings. This represents 73% of the total housing required over the same period (4,093) for strategic purposes and 47% of the total housing required over the same period (6,384) for planning applications. Both these housing land supply positions demonstrate that there is currently a shortfall in the Borough's housing land supply.

**3,001 dwellings / 4,093 dwellings x 100 = 73% (Strategic Purposes)**

**3,001 dwellings / 6,384 dwellings x 100 = 47% (Planning Applications)**

- 1.58 It is common, particularly in appeal situations for the supply of deliverable sites to be expressed as a number of years supply against the total annualised housing requirement.

- 1.59 For Strategic planning purposes, it is considered that there is 3.7 years' worth of deliverable housing supply in Basildon Borough i.e. there is a shortfall of 1.3 years or 1,092 homes.

**3,001 dwellings / 819 dwellings per annum = 3.7 years supply**

- 1.60 For the purposes of dealing with planning applications, it is considered that there is 2.4 years' worth of deliverable housing supply in Basildon Borough i.e. there is a shortfall of 2.6 years or 3,386 homes.

**3,001 dwellings / 1,277 dwellings per annum = 2.4 years supply**

Table 2: Summary of Five Year Land Supply Position Calculation

Part	Stages	Dwellings (Strategic Purpose calculation)	Dwellings (Planning Applications Purposes calculation )	Calculation	Notes
A	Past Housing Requirement	2,869	0		
B	Completions	2,587	0		
C	Shortfall (2014 – 2016)	282	0	(A-B)	
D	Future Housing Requirement	3,176	5,320		
E	Buffer	635	1,064		
F	Total 5 Year Land Supply Requirement	4,093	6,384	(C+D+E)	
G1	Supply in Planning Consents	1,918	1,918		There are planning consents for an outstanding 2,918 dwellings, which make up the entire RLA
G2	Supply from HELAA	913	913		
G3	Supply from Town Centre Regeneration	170	170		
G	Total Supply	3,001	3,001	(G1+G2+G3)	
H	Five Year Housing Land Supply	73% or 3.7 years supply	47% or 2.4 years supply	(G/F x 100)	

# APPENDICES

## APPENDIX A: NET COMPLETIONS FROM 2014

Years	Net Completions
April 2018- March 2019	340
April 2017-March 2018	341
April 2016-March 2017	412
April 2015-March 2016	816
April 2014-March 2015	678
<b>Total</b>	<b>2,247</b>

## APPENDIX B: PAST DELIVERY

Years	Net Completions
April 2013 - March 2014	119
April 2012 - March 2013	622
April 2011 - March 2012	700
April 2010 - March 2011	172

## APPENDIX C: EXTANT PERMISSIONS 2018

Site Address	Source	Reference	Total dwellings	Suitable	Available	Achievable	Units coming forward 2019 - 2024
Hermay, The Crossway, Break Egg Hill	RLA 2019	02/01380/FULL	1	Planning permission has been granted for one unit.	Work has started on the site. The developer still intends to build out the site.	Work has started on site. The Council are aware that the site will be built in the five year period 2019-2024.	1
1 - 29 Lower Southend Road, Wickford.	RLA 2019	05/00654/FULL	173	Planning permission has been granted for 173 unit.	BBA is engaging with the developer to build out the site.	Planning permission has been granted for one unit.	111
3-31 Runwell Road, Wickford	RLA 2019	06/00001/FULL	84	Planning permission has been granted for eighty four units.	The developer still intends to build out the site.	Work has started on site. The Council are aware that the site will be built in the five year period 2019-2024.	84
Madley Lodge, 304 London Road, Wickford.	RLA 2019	06/00244/FULL	8	Planning permission has been granted for eight units	The developer still intends to build out the site.	Work has started on site. The Council are aware that the site will be built in the five year period 2019-2024.	8
Laindon Link, Phase 3, Hatterill, Laindon, Basildon	RLA 2019	06/01507/FULL	186	Planning permission has been granted for one hundred and eighty six units.	A regeneration scheme where 107 dwellings have been completed. Part of the site will now be developed as part of the Laindon Town Centre Regeneration Scheme and only 12 units will be developed as part of this application on the remaining sites.	This is a regeneration scheme and has required demolition of existing premises and is being built out in phases. The remaining 12 units are expected to be built out in the five year plan period 2019-2024.	12
Dunton Fields, Southend Arterial Road, Dunton, Basildon	RLA 2019	12/00951/FULL	127	Planning permission has been granted for the construction of 179 units of which 127 are market housing. Only 3 units still outstanding.	This is a phased development where the developer is building out the entire site.	The Council are aware that the remaining five units will be built in the five year period 2019-2024.	3

Site Address	Source	Reference	Total dwellings	Suitable	Available	Achievable	Units coming forward 2019 - 2024
